LIFE & HEALTH OPPORTUNITY ROADMAP

From Licensed to Leveraged: The 7-Phase Path to Building Your Book

A step-by-step playbook for turning a life & Medicare insurance career into a self-funding business — and turning your tax bill into real estate equity.

PARALLEL

1 Get Licensed — WEEKS 1–2

Study and pass the licensing exam for your home state (budget 2 weeks), then get contracted on our eight-carrier shelf and set up E&O coverage.

2 Train & Run Wingmans — WEEKS 1–6

Start EverLife's **30 Days to Pro** the same week you begin licensing. Shadow closers, then run your own appointments as the wingman before going solo.

3 Credit Stack — WEEK 1

Apply for a stack of 0% intro-APR business cards for **$15K in free starting capital** — funds ad spend and training costs with none of it out of pocket.

⇋ **Phases 1–3 run at the same time** — start licensing, training, and the credit stack the same week, not one after another.

PRODUCTION & TEAM

4 Start Selling — ONGOING

Get in front of prospects consistently and write **$20K–$100K in AP per month** as your standard, sustainable pace — the proof the system works before you teach it.

5 Build Your Life Team — MONTHS 3–12

Show your results, market yourself, and share the opportunity. Recruit selectively into the same path, then override their production as the team grows.

LEVERAGE & WEALTH CONVERSION

6 Build the Medicare Branch — ONCE SELF-SUSTAINING

Set your monthly lifestyle number. Every dollar of life-team profit above it rolls into a **Medicare hiring fund** — a second, recurring-revenue branch that compounds through renewals.

7 Set Aside 20% for Taxes, Roll Into RV Parks — EVERY YEAR

Reserve 20% of net profit for taxes, then deploy it alongside Chandler in **RV park & MH acquisitions**, where bonus depreciation and cost segregation shelter the very liability it was set aside for.

01–03	04–05	06	07
Foundation	**Production**	**Leverage**	**Wealth**
Licensed & capitalized in week one	Prove it, then teach it	Surplus funds a second branch	Tax reserve becomes RV equity

Seven phases, one compounding machine — each phase funds the next, all the way to real estate equity.
